

Building the Future (the SEAMEO Legacy) Lyric

It's time to open our eyes
To a bright and promising future
We'll rise to the call of the times
And create a stronger tomorrow

Let's start to make a difference
Teaching everyone to learn
Through science, health and technology
We will share our expertise,
By promoting knowledge and policies
We can build a better world

Chorus:

Let us take a stand
For our visions of hope
Making future plans
For the people to grow
In a life filled with happiness and glee
Here at SEAMEO
Building the future
Is our legacy

We'll achieve our goals thru partnership
Creating opportunities
By working hand in hand we can
Accomplish all our dreams,
For a better quality of life
Is now within our reach

(Repeat Chorus)
