ELECTRIFYING PROGRAM EMPOWERS STUDENTS
COSI COMES TO (NAME OF SCHOOL, CITY)

(City) Date- Young minds get a jolt of energy when COSI (Center of Science and Industry) brings its traveling science program *Investigating Energy* to (name of school) on (date). This innovative, interactive program will stimulate the imaginations of the next generation of energy consumers. *Investigating Energy* is just one of six traveling science demonstrations from COSI.

The day begins with a 45-minute interactive assembly where COSI's Dr. Kilowatt will use different renewable and nonrenewable resources to power a new invention. This fun and educational assembly is followed by hands-on activity sessions during which students will test conductors, build circuits, and compare the energy usage of household appliances.

This COSI On Wheels program aligns with Ohio Academic Content Standards, and will allow your students to learn about energy conservation and pollution through scientific experimentation.

Investigating Energy is made possible through the generous support of presenting sponsor American Electric Power Foundation.

COSI is a hands-on science center located in Columbus, Ohio. Each year more than 350,000 students participate in one of the COSI On Wheels programs.

Come see for yourself! You are invited to see the COSI On Wheels *Investigating Energy* program in action.
