

**SEAMEO Schools' Network Summit (Virtual) on
"The Future of Teaching and Learning"**
9 March 2023

BIODATA

Mr Chris Harte

ANZSEA Government and Academic Engagement Lead
Google for Education
Singapore

Chris has an unwavering belief in the potential of young people to learn and thrive in a flourishing, diverse and equitable society they co-construct. He also believes that education systems and learning ecosystems underpinned by powerful technologies can help to achieve this potential.

Chris has worked in education since 2000, as an award winning languages teacher, a senior leader in one of the UK's most innovative schools, Director of the online school, Emerging Sciences Victoria, an independent consultant and now as ANZSEA Government and Academic Engagement Lead at Google for Education.

Chris has expertise in learning ecosystems, design thinking for system change and hybrid learning design. He also continues to focus his work on developing learner agency and methods to capture learning growth based on new metrics of educational success.

In his role at Google, Chris works with multiple jurisdictions across the region as a thought partner in developing vibrant, healthy learning ecosystems that use Google technology to develop educational equity, anywhere learning and provide data insights into learning growth.
