

Grade six teacher Mr. Vito Q. Encinares teaches about destruction of natural resources which can cause different calamities

These are the some of his examples of different calamities, some are caused by human destruction , others are natural hazards such as earthquake and landslides.

He grouped the pupils and made them to report after their session.

In our bulletin are information what to do before, during and after an occurrence of earthquake. Information from "Answers.yahoo.com" and "UPSeis." The display also include the school Disaster Risk Reduction Committees headed by the teachers.

The teacher let the pupils draw what they think will happen if people will not plant trees and continue illegal logging.
