

Participants

- Administrators ,Teachers & Students of SMK Abdul Rahman Talib, Kuantan, Parents- Teachers Association & the local community
- Turtle Sanctuary, Cherating, Kuantan

Project Coordinator
Genga Devi Rasiah

Aim

- To pioneer a conservation project on turtles in Pahang
- To provide an experiential and participatory approach for facilitating values formation

Rationale

- Turtles are a critically endangered species in Malaysia
- Records indicate a decimation of nesting populations
- Threats faced by turtles:
 - Over-exploitation of the eggs
 - Lost of nesting habitats due to beach front development
 - Marine pollution and non biodegradable marine debris
- Relevant to the biology syllabus of Form 4 and Form 6
- In line with the revised Science curriculum and the English curriculum

Objective

- To help in the conservation of our turtles
- To increase awareness on turtle conservation

Activities

- Campaign on the Turtle Adoption Project
- Day visit to the Turtle Sanctuary at Cherating
- Night visit to the Turtle Sanctuary during the release of hatchlings
- An ICT poster competition on Turtle Conservation
- Report on the Turtle Adoption Project in the school magazine
- Updating the Turtle Website
- Display on the Bulletin Board at the School's Resource Centre
- Display of turtle information on the Biology Panel Board
