

Additional Photographs as Evidence for SEAMEO Value Education Award 2013

Photo 1

Our students first learn how to make mud balls from our Smart-Partners (Shangrila's Tanjung Aru Resort). Venue: At the poolside in Tanjung Aru Beach Hotel. Kota Kinabalu in 2009. The ingredients for the mud balls were 'Bokashi' which means composed material in Japanese. In 2012, we make our own more economical activated microbes solution from rice-rinsed water.

Photo 2

Students making mud balls during an English Language lesson on processes and procedures. The lesson plan was prepared by the English teacher. Students carry out the activities and do the task given by the English teacher.

Photo 3

A handbook on mud balls for the rehabilitation of drains is placed in the school library for reference. It contains the ingredients and procedures for making mud balls as well as theory on its benefits. We reuse the old table- calendars for this purpose.

Photo 4

One of our strategies is inviting prominent personnel to officiate the mud ball making and tossing activities. Datuk Edward Yong (centre), the elected State Assemblyman for Tanjung Aru was our Guest of Honour when the mud balls were tossed into the drains around the low- cost housing area behind the school. Mr Chiam Yau Chung (right), an ex-student of La Salle is our mentor and sponsor since 2011. The principal of La Salle and the Chinese Capitan of Tanjung Aru was also present at the launching.

Photo 5

All the boys were very excited to toss the mud balls into the drains!

Photo 6

La Salle boys carrying the mud balls to the drains around Tanjung Aru. They love it!

Photo 7

The Vice President of the PTA (Parent-Teachers' Association) also came to give moral support to the boys and participated in the mud ball tossing because they know the benefits of rehabilitation of drains and to instill love, appreciation and care for the environment into the minds of their children is essential.

Photo 8

Tentative Plan of the new Buy Back Centre and shaded areas for making mud balls. Our Smart-Partners from Grubbe High. Umea. Sweden helped La Salle to get a sponsor from an Architectural Company in Sweden in 2012. It will be built once the final plan is approved by the relevant parties
