

English Brief Description

- This student presentation and paper elaborates the phenomena of significant decrease of total number of farmers in Tasikmalaya region. It is very interesting fact, since Tasikmalaya is an agricultural region. On this paper, the student portrays the data from the last national agriculture census. They found that the number of household farmers drop by 38.159 from 320.832 households in 2003 to 282.673 households in 2013. This number shows that on average there is a decrease of 1,19 percent per year of the total household farmers in Tasikmalaya.
- The student also describes that there are several factors that contribute to the decline of the total household farmers in Tasikmalaya. First is migration, especially from Tasikmalaya to the metropolitan areas of Bandung and Jakarta. Second, is the decline of income from agricultural sectors. Further, one factor that contribute to the decrease of the farming production is caused by the brick industry. Third is the decrease of agricultural land areas. Lastly, unstable seasons for farming (rainy and dry), which make unpredictable time and result for farming activities.

ANALISIS PERMASALAHAN PENURUNAN JUMLAH PETANI DI KABUPATEN TASIKMALAYA

SMK WIDYA MUKTI

LATAR BELAKANG MASALAH

Latar Belakang
Masalah

1. Kondisi daerah dan lahan di Kab. Tasikmalaya cukup baik untuk pertanian.

2. Jumlah petani di Kab. Tasikmalaya mengalami penurunan seiring berjalanannya waktu.

3. Penurunan itu disebabkan beberapa faktor dan telah menimbulkan dampak.

RUMUSAN MASALAH

Rumusan Masalah

- 1. Bagaimana kondisi permasalahan menurunnya jumlah petani di Kab. Tasikmalaya ?
- 2. Apa penyebab dari masalah menurunnya jumlah petani di Kab. Tasikmalaya ?
- 3. Bagaimana dampak dari berkurangnya jumlah petani di Kab. Tasikmalaya ?
