

A person or a committee is assigned to implement Environmental programs and projects for the school

Since 2009, the school has been very active in protecting the environment and conducting activities related to it. In this regard, pointed persons and committees has been designated through school memorandum to be the focal persons to lead the different environmental programs and activities. These committees are composed of teachers, parents, barangay council members and other externals stakeholders, who truly work hard to achieve target goals.

*Previous committee, wherein some of the teacher-members are already retired and transferred in other schools/offices, but still applying their eco-friendly learned practices at SIES.*

In addition to this, other pupil organizations and clubs are including environment concerns in their school activities. Thus, pupil-patrollers are doing their part in monitoring their assigned environmental tasks and in implementing the environmental policies which they are of concern.

# The Eco Patrollers

**Children Task  
Force Patrol**

**Electricity Patrol**

**Community  
Patrol**

**Child E-Care  
Patrol**
