## Clear articulation and integration of social, ethical, environment and climate change dimensions in the institution's vision, mission and governance

### A. The School Improvement Plan or its equivalent, incorporates, integrates and clearly articulates sustainability thrust, to include climate change dimensions

The school has been committed on its advocacy on environment concerns, because of this, environmental aspects has been included on some action plans of the school, together with the School Improvement Plan (SIP) formulated by the different individuals who are behind the progress of the school.

Consequently, the action plan of the Eco Club in the school highlights sustainability of the environmental programs of the school align with the sustainability thrust and climate change dimensions.

The various environmental sustainability agenda is integrated and clearly articulated in the SIP. Moreover, the school administration affirms high compliance on the environmental sustainability integration in almost all undertakings of the school. Efficient waste management is utilized to combat climate change promoting resilient and sustainable environmental programs and projects. Thus, these will aid environmental protection and ensuring the SIESians' living environment in school of high quality.

### B. The Policy of the school is communicated to constituents in the school (students, academic and non-academic staff, and parent-teachers' association)

San Isidro Elementary School is under the umbrella of the Department of Education (DepED), which brought down a nationwide vision and mission for its subordinates. Thus, the school mandates this protocol. In relation to this, the school has its means of disseminating different information and policies to all its clienteles and stakeholders.

The SIP of the school incorporates campaign and activities on environmental aspects and climate change awareness.

In line with these, we do have our specific vision-mission to target a common goal, which is to holistically develop our student, to be the best that they can be oriented with their duties and responsibilities as a responsible and productive citizen.

#### \* VISION of SIES

San Isidro Elementary School as child and eco-friendly school by year 2020. Being a child and eco-friendly school means that:

It is a child-seeking school — actively identifying excluded children to get them enrolled in school and included in learning, treating children as subjects with rights.

#### \* MISSION of SIES

In line with its vision, San Isidro Elementary School has the mission to:

- maintain and support a complete, adequate and integrated system of quality basic education
- inculcate the values of being God loving, patriotic, humane an environment friendly
- lay foundation for lifelong learning and service for the good of the people
- develop a child and eco-friendly learning environment

# Some Implemented Rules and Regulations

### School Policies on Environmental Awareness 1. Use natural ventilation whenever possible. - Turn on electric fans only from 10:30-12:00 and 1:00-3:00 PM. 2. Use energy savers bulb instead of incandescent bulbs. 3. Turn on lights only when needed. 4. Report leaks promptly. 5. Use water from artesian well in watering plants in the morning. Use the well also in washing rags, curtains etc. 6. Do not throw used papers. Put them in the paper boxes which can be found in every classroom. **Environmental Policy is existen** school Memora
