

**SEAMEO Online series**  
**SEA-Teacher-TVET Lecture Series**

It is clear that this pandemic has utterly disrupted an education system that many assert was already losing its relevance. I believe move to online learning is a catalyst to create a new, more effective method of educating students and developing professionalism of the teachers, that's what SEAMEO Online Series became useful to me to develop professional literacy amidst COVID19. In many respect, there are various online lecture series but, with SEAMEO, overall, I'd gave me and I think participants a guide to pursue learning and teaching online education an average with lots of room for practice as Professional teacher.

No more than less, I would like to extend my sincerest gratitude to the Organizer and Education Staff of SEAMEO for reshaping Teacher's teaching modalities. Also it provides good professionalism by helping us to remind that Ethics must always be hand-in-hand in dealing with significant others.

Hope that your continue support last not just during pandemic but for as long as TEACHING is THERE. LIFE LONG LEARNING, is what you reshape teachers.

Thank You and God Bless.
