

This webinar series, particularly today's webinar has offered us different applications and platforms on making this online class easier, more convenient and satisfactory more teachers and the students. Amid the pandemic learning should not be stopped. I'm just glad that I have attended this SEAMEO webinar series, it helped me a lot on which application should I explore and use. One of my favorites is the Class Craft, I know this application is exciting, very handy to use and helpful. Looking forward for more webinar from SEAMEO. Thank you very much.
