

This 2nd SEA-Teacher TVET Lecture Series with the theme: Innovative Teacher Education in the New Normal is beneficial for me as a Senior College student and a future educator. Months from now, I will be having the chance to be on the field to conduct my practicum as a teacher. That being said, I am expected to adapt to all the changes that this pandemic has brought to the world specially in the field of education. Good thing we are already in the era of technological advancements so everything is possible. Educational institutions and its members should be equipped with all the necessary tools needed to promote good quality of education amidst the challenges that COVID 19 have brought to the world.

This lecture series helped me to acquire lots of knowledge on how a teacher can integrate all existing and emerging technologies such as computer software, websites, mobile and computer applications, broadcasting networks and social media sites available in making the teaching and learning process conducive and engaging to all kinds of learners not only in Southeast Asia but in the world. Another thing that I like about this lecture series is that, it didn't just focus on the multimedia development of the teachers but also their psychological/mental readiness to cater the learners and colleagues who may have experience anxiety, stress and depressions brought by this pandemic.

It is indeed a great pleasure to be one of the participants of this lecture series so I want to extend my heartfelt gratitude to SEAMEO and all the organizers who made this seminar possible.

Mabuhay SEAMEO!
