

Technology developed and change rapidly, in the midst of the pandemic that the whole world experiencing. Education change its pattern from face to face to online learning. Education must continue to teachers or educators must be innovative in the bigger challenge now. We are lucky enough as educator to watch and be a part of the international webinar free offered by the SEAMED ONLINE SERIES , it is very useful on my professional development as teacher to be prepare on the online teaching and I learned new techniques which was introduce by the 15 speakers in the said seminar. Student engagement in the online learning supports the idea that engagement is crucial to student success. My full awareness sustain me in the different techniques or methods to adopt and promote the education on my teaching career.
